**KEEP CALM AND BUILD UP  
A STROKE CARE IN UKRAINE**

Ukrainian Stroke  
Medicine Society

## | 2018 Poltava Simulation Training Center establishment

Establishing a simulation training center became the starting point for disseminating this training format among specialists in Ukraine who provide assistance to stroke patients.

Ukrainian Stroke  
Medicine Society

## 166 members — | June, 2020

the non-governmental organization aims to enhance stroke care in Ukraine; currently 1571 members

## | 2021

First trainings for speakers and trainers

# OUR KEY PROJECTS

**the aim is to train medical professionals involved in outpatient care for stroke patients; this involves engaging young specialists to exchange experiences and improve local stroke services, as well as building a network to disseminate educational events and projects**

***conducting simulation trainings  
for stroke care specialists***

***Young Stroke Physician School:  
educational project for young specialists***

Ukrainian Stroke  
Medicine Society

# OUR KEY PROJECTS

also we regularly conduct educational courses and events for both doctors and the general population.

We believe that increasing the number of trained stroke care specialists and enhancing awareness among non-medical individuals are crucial steps towards improving the overall quality of stroke care

*public awareness campaign  
for non-medicals*

*thematical courses for involving more  
specialists in neurointerventions*

# OUR KEY PROJECTS

collaboration with colleagues across different levels of medical care is vital to providing robust support for stroke patients and outpatient care; therefore, we maintain communication with primary care physicians and actively develop this collaboration

educational platform, conferences and webinars,  
collaboration with other educational platforms

## Acute Ischemic Stroke: Action Algorithm

Official provider of Continuing
